Program Summary

05 October 2023- The LaKAR (Training, Impact, Analysis, Treat & Refer) program was held at the Maxim Textile Technology Sdn. Bhd. in collaboration with the Kulai District Health Office, this program was inaugurated by the District Health Officer, Kulai District Health Office, Dr. Mohd Anwar Shahrir Bin Ahmad. A total of 362 employees have participated in this program. This effort is part of the Company's commitment in its corporate social responsibility activities to ensure that the welfare and health of employees are maintained in addition to supporting the Malaysian Ministry of Health's goal of reducing the number of leprosy cases in the future towards zero leprosy.

LaKAR is an approach under the Post-Elimination Strategy to actively detect cases to further reduce the number of leprosy cases towards zero leprosy. Leprosy is included in the Neglected Tropical Disease where this disease is often forgotten or given less priority since it is an ancient disease with a small number of cases and usually occurs among certain communities in society.

Various activities and fillings have been carried out. Among them, leprosy/TB screening, health screening (ANMS/PeKA), HPV screening, smoking screening, leprosy talk, leprosy exhibition, nutrition exhibition, know your medicine exhibition and healthy lifestyle exhibition. In addition to that, this program is also filled with Mental Health Awareness activities and a lucky draw where all the prizes provided are based on health products approved by the Malaysian Ministry of Health.
